

# Please Help *Save* My Ride

New Jersey's Community Transportation programs provide transportation services for senior citizens, persons with disabilities, veterans and the economically disadvantaged. Transportation services are provided for non-emergency medical appointments, dialysis, physical and mental therapies, chemotherapy, radiation treatments, nutrition sites, meals on wheels, non-competitive workshops, employment, education, food shopping, veteran services, recreational activities and many other services.

Dear Governor Corzine and my  
Legislative Representatives,

New Jersey's community transportation  
needs your support. I need your support.

Funding to provide transportation for  
senior citizens, persons with disabilities  
and the economically disadvantaged is  
steadily decreasing.

**I strongly urge you to support  
Assembly Bill A-2046 and Senate Bill  
S-1830.** When passed, these bills will  
allow transportation services to maintain  
current service levels.

These bills are only part of the answer.  
I also implore you to set up a bi-partisan  
committee to look at new ways to fund  
our much needed and always in  
demand community transportation  
programs.
