The problem was discovered after various meat products produced by CL Saigon Food Co. and labeled with the marks of inspection were observed in commerce at a retail market. FSIS conducted surveillance at the establishment and confirmed that the firm distributed amenable products without the benefit of inspection.

There have been no confirmed reports of adverse reactions due to consumption of these products. Anyone concerned about a reaction should contact a healthcare provider.

FSIS is concerned that some product may be in consumers' refrigerators and freezers. Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.

FSIS routinely conducts recall effectiveness checks to verify recalling firms notify their customers of the recall and that steps are taken to make certain that the product is no longer available to consumers. When available, the retail distribution list(s) will be posted on the FSIS website at [www.fsis.usda.gov/recalls](http://www.fsis.usda.gov/recalls).
