The Health Department along with the citizens of Clifton shared in the celebration of Clifton’s Centennial. Our staff helped sing Happy Birthday on April 26th; and watched as the time capsule from its 50th birthday was opened. We participated in the Centennial Parade, and many attended the Gala in November to round out the year long celebration.
The current Board of Health commissioners were part of a video/powerpoint presentation to emphasize the vast history of the City and the Board. The Board of Health was formed in 1896 when Clifton was known as Acquackanonk Township, and still functions as an important professional advisory group as Clifton enters its second hundred years.

Established by municipal resolution, the Board of Health is an advisory body composed of Clifton Residents appointed by the Council. It is comprised of 7 commissioners. All commissioners serve three-year terms and are all members of the National Association of Local Boards of Health (NALBOH).

**2017 Board Members:**

- **Dan Neczepir,**
  President
- **Carol Prawetz, RN,**
  Vice-President
- **Michael Bimonte, MD**
- **Barbara Lake, RN**
- **Nancy Scangarello, NP**
- **Jane Scarfo, RN**
- **George Scordilis, DC**
- **Thomas Garretson**

*The Clifton Board of Health adopting the Health Department’s Strategic Plan and Quality Improvement Plan.*

Pictured: Front row (from left to right): Carol Prawetz (Vice President), Dan Neczepir (President), George Scordilis. Back row (from left to right): Councilman Ray Grabowski, Michael Bimonte, Barbara Lake, and Jane Scarfo. Missing: Nancy Scangarello.
Your local public health department protects and improves the health and well being of your community, as well as the environmental resources upon which we all depend.

Since 1900, the average lifespan of U.S. residents has increased by more than 30 years, with 25 years of this gain attributable to advances in public health, such as:

- Animal Bites & Rabies Control
- Childhood Lead Poisoning Control
- Communicable Disease Control
- Emergency Preparedness & Response
- Health Education & Promotion
- Individualized Clinical Services
- Inquiries, Issues, and Complaint Investigations
- Kennels, Pet Shops, and Shelter/Pound Facilities
- Recreational Bathing Facilities
- Retail Food Establishment Safety
- School Immunization Record Audits
- Tanning Facility Safety
- Vaccination
- Youth Camps

During 2017, the Clifton Health Department also provided local health services to the Township of Little Falls.

Your health department:
- Protects you from health threats. Your health department works to prevent disease outbreaks and makes sure the water you drink, the food you eat, and the air you breathe are all safe. We are also ready to respond to any health emergency - be it bioterrorism, SARS, Zika Virus, or a new environmental health hazard.
- Educates you and your neighbors about health issues. Your health department provides you with information that helps you make healthy decisions, like exercising more, eating right, quitting smoking, and washing your hands to protect yourself from communicable diseases. During a public health emergency, we also provide important alerts and warnings to protect your health.
- Provides healthy solutions. Your health department offers the preventative care you need to avoid disease and maintain your health. We provide flu shots for the elderly and help mothers get prenatal care to give their babies a healthy start. We also help provide uninsured children with regular check-ups, immunizations, and good nutrition to help them grow and learn.
- Advances community health. Your health department takes part in developing new policies and standards that address existing and emerging challenges to your community’s health while enforcing a range of laws to help keep you safe. We work through research and staff training to maintain expertise and deliver up-to-date, cutting-edge health problems.
I am pleased to present the Clifton Health Department’s 2017 Annual Report. It has been another successful year for the Clifton Health Department in so many ways. In 2017, the Health Department sought innovative ways to collaborate with community leaders and organizations to provide quality services and programs aimed at keeping our residents healthy and safe. Some of these partners include St. Mary’s Hospital, Hackensack Mountainside Hospital, the Essex Passaic Wellness Coalition, the North Jersey Health Collaborative, St. Peter’s Haven, Clifton Public Schools, the Clifton Boys & Girls Club, Montclair State University, and William Paterson University.

The Health Department said goodbye to two long-time employees in 2017. Animal Control Officer Robert Boyle and Clerk Typist Carol Geiger. Both employees each worked over 35 years for the City. Bob was a true gentleman and professional during his years of service, and I wish him the best of luck in his retirement. Bob dealt with many tough situations and always handled them in a fair and professional manner. Carol was a fixture in the department and processed numerous licenses and handled many complaints in a timely manner. Her positive attitude and strong work ethic will be greatly missed.

The Health Department has continued the accreditation process which has had such a positive impact on the Health Department. Health Department staff work each day to evaluate the work we do to provide the highest level of quality services and further advance our community’s health. The accreditation process has also enhanced accountability and transparency within the health department.

In May, Health Educator Layal Helwani coordinated the Health Department’s 4th Annual Employee Health Fair. The purpose of the Employee Health Fair was to empower City of Clifton employees to maintain healthy lifestyles by offering preventive screenings, activities, and literature on different health-related topics, as well as information on programs, services, and providers in our local community. Vendors included St. Mary’s General Hospital, Scordilis Chiropractic, Horizon Blue Cross Blue Shield, Shop Rite of Little Falls, and Blink Fitness. About 120 employees enthusiastically took advantage of the screenings, classes, and educational resources that were available at the Health Fair.
2017 was the second year of the NJ Healthy Communities Network grant, which was awarded by Partners for Health Foundation. The Health Department once again partnered with City Green to bring the Veggie Mobile to Clifton City Hall every Wednesday for two hours. The Health Department was also instrumental in purchasing bike racks and walking path signs to increase biking and walking throughout the City and improve the built environment. The Department’s Worksite Wellness Committee initiated a Take-the-Stairs campaign in City Hall and a monthly Employee Salad Club. The committee also worked to increase the number of healthy beverage and snack choices in City Hall’s vending machines.

The Health Department was also selected by Sustainable New Jersey to receive a small grant from PSE&G to initiate a vehicle-idling prevention and education program throughout the community. The Health Department helped to pass a no-idling resolution, promoted the installation of no-idling signage in a variety of priority locations such as schools and businesses, and implemented an educational campaign using traditional communication methods and social media. Several anti-idling presentations were provided to schools, businesses, City employees, and community organizations, reaching over 500 people. Anti-idling infographics, car magnets, bookmarks, and keychains were distributed to raise awareness of the dangers of vehicle idling on the environment and human health.

In the fall of 2017, the Health Department was designated by the City Manager to lead the homelessness prevention initiative for the City. We were lucky to hire Mary Rossettini as a Social Worker Consultant, who helped develop a homelessness prevention taskforce, which includes representation from the Police and Fire Departments along with other community leaders. This taskforce prepared to do the first Project Homeless Connect which will allow us to apply for future funding to combat homelessness in the City.

The City of Clifton is very fortunate to have a Health Department so dedicated to ensuring the health, safety, and well-being of the public. We are fortunate to be supported in our public health endeavors by our Mayor, Council, and City Manager. I would like to especially thank the Board of Health for all of its support throughout the year. Together with our partners, the Clifton Health Department will work towards achieving its vision: Healthy people making healthy choices in a healthy environment.

John E. Biegel, III
Health Officer
Director of Health & Human Services
Highlights of 2017

Centennial Parade, May 2017

Robert Boyle, ACO retired after 37 years of service in December of 2017

Carol Geiger retired after 30+ years of service in February 2017

Centennial Gala, November 2017
Accreditation is a status that provides public notification that an institution, program, or agency meets standards of quality set forth by an accrediting agency. The accreditation process reflects the fact that the institution, agency or program is committed to self-study and external review by one’s peers. Accreditation has been widely accepted by many fields within the US including the healthcare system, schools, and social service agencies such as police and fire departments. Likewise, public health agencies need to demonstrate their accountability to their community, and measure agency performance against nationally-established standards. We need to move away from the old saying ‘when you’ve seen one health department, you’ve seen one health department’, and toward a place where regardless of where you live, you receive the same level of service from your governmental public health department.

The Public Health Accreditation Board, or PHAB, is a nonprofit organization dedicated to advancing the quality and performance of state, local, tribal, and territorial public health departments by providing a national framework of standards. PHAB has a vision of improving the quality and performance of all health departments in the U.S. through voluntary accreditation. The PHAB voluntary accreditation program emphasizes the importance of and is grounded in quality improvement, and has catalyzed health department activity in this arena. The process of preparing for and achieving accreditation yields information about the agency that can be used to identify areas of improvement. Once accredited, health departments maintain this status for 5 years.

The main component of the accreditation process is the documentation selection process, based on a set of standards and measures. These standards measure overall agency capacity as opposed to focusing on specific program areas such as preparedness or community health. The standards are primarily based on the 10 essential public health services, the Operational Definition of a Functions Local Health Department, the National Public Health Performance Standards Program, etc. In other words, they were developed based on already nationally recognized initiatives and went through extensive public comment. The standards are divided into 12 domains. The first 10 are based on the 10 essential services and the last two are based on agency administrative capacity and governance.

- **Domain 1**: Conduct and disseminate assessments focused on population health status and public health issues facing the community
- **Domain 2**: Investigate health problems and environmental public health hazards to protect the community
- **Domain 3**: Inform and educate about public health issues and functions
- **Domain 4**: Engage with the community to identify and address health problems
- **Domain 5**: Develop public health policies and plans
- **Domain 6**: Enforce public health laws and regulations
- **Domain 7**: Promote strategies to improve access to healthcare services
- **Domain 8**: Maintain a competent public health workforce
- **Domain 9**: Evaluate and continuously improve processes, programs and interventions
- **Domain 10**: Contribute to and apply the evidence base of public health
- **Domain 11**: Maintain administrative and management capacity
- **Domain 12**: Maintain capacity to engage the public health governing entity

The Clifton Health Department started the accreditation process in early 2015 and has been working diligently toward accreditation with hopes to apply for accreditation in December 2018. For any questions regarding accreditation, please contact Jennifer Kidd, Health Projects Coordinator, at 973-470-5774 or jkidd@cliftonnj.org.
Quality Improvement in Public Health is the use of a deliberate and defined improvement process, such as Plan-Do-Check-Act, which is focused on activities that are responsive to community needs and improving population health. It refers to a continuous and ongoing effort to achieve measurable improvements in the efficiency, effectiveness, performance, accountability, outcomes, and other indicators of quality in services or processes which achieve equity and improve the health of the community. The Clifton Health Department developed its first QI Plan in 2016.

</table>
Background:

Physical Activity Strategies
- Assessment conducted by Clifton Health Department showed that the City of Clifton lacked in non-structured active living and leisure opportunities
- Planning team decided to focus on the built environment and enhance walking paths to increase lifetime fitness and allow families to participate in physical activity together. Bike racks were also needed at City Hall and parks
- Worksite Wellness Committee initiated a Take the Stairs campaign for employees at City Hall

Nutrition Strategies
- City Green purchased a Veggie Mobile which allows the organization to offer pop-up farm stands throughout Passaic County
- Clifton Health Dept. partnered with City Green to bring the Veggie Mobile to Clifton City Hall each Wednesday from 11am-1pm
- Worksite Wellness Committee started monthly Employee Salad Club meetings and improved choices at City Hall vending machines

2017 Timeline:
- January: Convened Year 2 kick-off meeting with partners to discuss progress and upcoming activities
- March: Determined locations for four (4) bicycle racks with input from community; purchased bike racks; identified parks in Clifton that would receive new walking path signs
- April: Held National Walking Day; reinstated Employee Walking Club
- May: Began planning for Summer 2017 Veggie Mobile markets
- June: Held first market of 2017 season
- August: Purchased 30 posts for walking path signs
- September: Purchased signs to be mounted on posts; waiting on installation of walking paths by DPW; four (4) more bike racks purchased to be placed at designated city parks

Outcomes & Accomplishments:
The Clifton Health Department has held:
- 22 Veggie Mobile markets with a total of approximately 1,000 visitors
- Over 30 Employee Walking Club sessions
- Nine (9) Employee Salad Club sessions with 17 active members
- Montclair State University Nutrition Department conducted surveys of Clifton’s farmers market and published Examination of Farm-to-Workplace Initiative
- Anticipated installation of 30 walking path signs in four (4) of the largest city parks
- Development of the Steps to a Healthier Clifton logo
- Two new bike racks installed at City Hall
- Anticipated installation of four (4) more bike racks at designated city parks
- Healthier vending machines at City Hall
- Employee stairwell decorated with motivational messages as part of Take the Stairs Campaign

The NJ Healthy Communities Network Grant was funded by Partners for Health Foundation.
The City of Clifton was awarded a $2,000 Sustainable Jersey capacity-building grant funded by the PSEG Foundation to implement an anti-idling campaign throughout the city. Clean Air Clifton has been actively promoting the installation of no-idling signage in a variety of priority locations such as schools and commercial loading areas, and implementing an educational campaign targeting key stakeholder groups using traditional communication methods and social media.

- Schools
- Local Businesses
The City of Clifton Health Department strives to provide the best public health services to its citizens to improve the well-being of the public, including animals. The Animal Control Officers of the Clifton Health Department are compassionate animal welfare professionals. Our three (3) Animal Control Officers have a combined 59 years of experience in all aspects of animal control services. Animal Control Officers enforce local and regional laws concerning the care and treatment of animals and educate the public about animal control safety.

Officers often respond to calls from citizens about stray animals and suspected animal cruelty. Sometimes, officers have to capture or rescue animals, but other times administer warnings or citations to citizens suspected of animal cruelty and mistreatment. Clifton’s Animal Control Officers possess superior attention to detail and knowledge of New Jersey sheltering, animal control laws and regulations, animal health, animal well-being, including nutritional needs, resources for information, knowledge of common animal disease and treatments, skills in animal first-aid, and CPR.

Animal Control Officers also ensure that all dogs living in the City of Clifton are registered. As per ordinance, 203-2, “Any resident who shall own, keep or harbor a dog of licensing age (6 months or older) in the City of Clifton shall, in the month of January of each year, apply from the Clifton Health Department, a license and official metal registration tag for each dog owned, and shall place upon each dog on their collar or harness.” The Clifton Health Department offers rabies clinics for dogs twice a year (spring and fall) and cats once per year (spring). All animals can get vaccinated from this deadly disease.

To protect individuals and their domestic animals, Animal Control Officers are responsible for collecting and impounding lost pets, stray domestic animals, and sick, injured, or dangerous animals. The Clifton Health Department either coordinates with or directly supervises Animal Control Officers to prevent the spread of rabies and to ensure that anyone potentially exposed to rabies receives proper treatment.

For more information, contact John Tauber, ACO at 973-470-5760.

The Clifton Health Department provides Animal Control Services to the following Municipalities:

City of Clifton  Township of Little Falls  Borough of Wallington

Persons who are bitten by an animal or come into contact with a suspect rabid animal should notify the Clifton Health Department immediately.

For more information, contact John Tauber, ACO at 973-470-5760.

All municipalities in New Jersey are responsible for licensing domestic dogs, to ensure that dogs and the people they interact with are protected from rabies. Pet licensing programs also help to quickly reunite lost pets with their owners. In the City of Clifton, the local health department manages the pet licensing program.

For more information, contact Victoria Kaufman at 973-470-5770 or vkaufman@cliftonnj.org.

The number of dogs licensed for during the year of 2017: 3,348.

Dog Census officers go door to door to houses without licensed dogs. The salaries of the officers are offset by additional revenue that is generated. Census is an important tool to control rabies outbreaks.

Animals & Rabies

What animals get rabies?
Rabies is a disease that naturally affects only mammals. Mammals are warm-blooded animals with fur. People are mammals, and so are most of our pets like cats and dogs. Lots of farm animals like cows and horses are mammals, and so are wild animals like foxes and skunks, raccoons and bats. Birds, snakes, and fish are not mammals, so they can’t get rabies and they can’t give it to you.

In the United States today, about 93 of every 100 reported cases of rabies are in wild animals. Raccoons are the most common wild animal with rabies.

Wildlife in Clifton

The Clifton Animal Control Officers respond to calls on potentially rabid or injured wildlife and nuisance wildlife complaints.

For more information, contact John Tauber, ACO at 973-470-5760.

What Does Risk Level Mean?

“Risk type 1 food establishment” means any retail food establishment that:
1. Serves or sells only pre-packaged, non potentially hazardous foods;
2. Prepares only non-potentially hazardous foods; or
3. Heats only commercially processed, potentially hazardous foods for hot holding and does not cool potentially hazardous foods. Such retail establishments may include, but are not limited to, convenience store operations, hot dog carts, and coffee shops.

“Risk type 2 food establishment” means any retail food establishment that has a limited menu; and
1. Prepares, cooks, and serves most products immediately;
2. Exercises hot and cold holding of potentially hazardous foods after preparation or cooking; or
3. Limits the complex preparation of potentially hazardous foods, including the cooking, cooling, and reheating for hot holding, to two or fewer items. Such retail establishments may include, but are not limited to, retail food store operations, schools that do not serve a highly susceptible population, and quick service operations, depending on the menu and preparation procedures.

“Risk Type 3 food establishment” means any retail food establishment that:
1. Has an extensive menu which requires the handling of raw ingredients; and is involved in the complex preparation of menu items that includes the cooking, cooling, and reheating of at least three or more potentially hazardous foods; or
2. Prepares and serves potentially hazardous foods including the extensive handling of raw ingredients; and whose primary service population is a highly susceptible population. Such establishments may include, but are not limited to, full service restaurants, diners, commissaries, and catering operations; or hospitals, nursing homes, and preschools preparing and serving potentially hazardous foods.

“Risk type 4 food establishment” means a retail food establishment that:
conducts specialized processes such as smoking, curing, canning, bottling, acidification designed to control pathogen proliferation, or any reduced oxygen packaging intended for extended shelf-life where such activities may require the assistance of a trained food technologist. Such establishments include those establishments conducting specialized processing at retail.

What Do These Placards Mean?

“Satisfactory” = Establishment is in compliance with Chapter 24 food safety and sanitation principles.

“Conditionally Satisfactory” = Establishment is not in complete compliance with Chapter 24 food safety and sanitation principles, and is in violation of one or more provisions of this chapter. A re-inspection will be needed.

“Unsatisfactory” = Establishment has been found to have multiple violations that are not in compliance with Chapter 24 food safety and sanitation principles which can pose a health hazard.
Local health departments inspect and regulate restaurants, grocery stores, and other retail food facilities to ensure compliance with safety and sanitation rules. Local health departments also investigate and control disease outbreaks linked to retail food facilities.

For more information, contact Nino Intili at 973-470-5765 or nintili@cliftonnj.org.

Tanning Facility Safety

The Clifton Health Department enforces safety and sanitation standards for the operation of tanning facilities in order to protect the health and safety of consumers who patronize tanning facilities.

For more information, contact Melissa Spencer at 973-470-5764 or mspencer@cliftonnj.org.

Potable Wells and Drinking Water Safety

The Clifton Health Department collects potable well water samples quarterly.

For more information, contact Melissa Spencer at 973-470-5764 or mspencer@cliftonnj.org.

Youth Camps

Local health departments enforce safety and sanitation standards for the operation of youth camps in order to protect the health and safety of children who attend these programs.

For more information, contact Melissa Spencer at 973-470-5764 or mspencer@cliftonnj.org.

The Hazardous Materials Control Board was established in and for the City of Clifton, which Board shall serve without compensation in matters touching on and concerning the prevention and control of hazardous chemicals and materials. It is also known and designated as the “Local Emergency Planning Committee” (LEPC) AS PER FEDERAL REGULATION. The Board makes recommendations to ensure that storage and use of hazardous chemicals in Clifton are done in accordance to federal, state and local laws to ensure the safety of the residents and businesses in Clifton. Any new businesses entering Clifton (through Building Department CBC applications must report any hazardous materials that will be used or stored onsite via HMCB application and Fire Department Inventory Sheet.)

For more information, contact Anthony Marrone at 973-470-5769 or amarrone@cliftonnj.org.
Established by municipal resolution, the Clifton Environmental Commission is an advisory body composed of Clifton residents appointed by the Mayor. It is comprised of 7 regular members and 2 alternates including a member of the Clifton Planning Board. All commissioners serve one, two and three-year terms.

The role of the Commission is to study, evaluate, and make recommendations to the City Council regarding local environmental issues, including (but not limited to): solid waste management and recycling; clean water resources; storm water management; energy conservation and renewable energy resources; air, noise, and light pollution control; preservation and use of parks and other open spaces; land use; and protection of flora, fauna, soil, and landscape throughout the City of Clifton. The Commission also conducts research and coordinates activities regarding the use and potential use of open land areas, including recommendations to the City Council for acquisitions of open space. It also serves as a watchdog for environmental concerns opportunities within the City. The Clifton Environmental Commission also provides environmental education to residents.

For more information, contact Anthony Marrone at 973-470-5769 or amarrone@cliftonnj.org.
Provides accurate information about ways to make healthy behavior changes. Using pamphlets, flyers, poster boards, public service announcements, programs, social media & our website, we provide information to the public to help citizens make wise decisions about their health. This allows them the opportunity to live in the healthiest atmosphere possible. Health Educators also play a vital role in developing new policies & standards that address existing & emerging challenges to our community’s health. Through health research & training staff to maintain exceptional expertise, educators are able to deliver modern & progressive health programs for children to seniors.

**SCHOOL HEALTH EDUCATION:**
Available to non-public & public schools for program consultation & implementation.

**SPEAKER SERVICE:**
Programs on a variety of health topics to various types of groups.

**HEALTH INFORMATION:**
Provide & distribute educational materials on various health topics to help individuals make wise health decisions.

**EMERGENCY PREPAREDNESS:**
We focus on minimizing the health threats from public health emergencies. We are dedicated to educating citizens on how to prepare for & protect themselves during public health emergencies including those from chemicals, biological, radiological, nuclear & explosives.

**DENTAL HEALTH EDUCATION:**
Provide dental health education to children during National’s Children Dental Health Month.

**PANDEMIC INFORMATION:**
Information, programs & presentations are available on previous historic pandemics, current pandemic events & predicted future events. Please speak to our Health Educators to plan an event that will meet your specific needs.

**SMOKING PREVENTION**

**DRUG & ALCOHOL PREVENTION & EDUCATION**

**FITNESS & NUTRITION EDUCATION**

**BLOODBORNE PATHOGENS:**
Required training for at risk city employees who may come in contact with blood & other potentially infectious material. This program teaches employees how to use Universal Precautions so that they are protected from blood borne diseases.
Local health departments monitor the community for infectious or communicable diseases, public health nursing and case investigation & disease outbreak prevention and mitigation, health education/risk communication, partnerships with traditional and non-traditional emergency responders and the community-at-large, and environmental contamination mitigation post-event (natural or manmade disasters).

For more information, contact Layal Helwani at 973-470-5773 or lhelwani@cliftonnj.org.

The Clifton Health Department has an updated Continuity of Operations Plan.

The Clifton Health Department has updated plans to respond to the following types of emergencies that involve:

- Retail food safety
- Multi-family housing
- Food-borne disease outbreaks
- Infectious disease outbreaks
- Hazardous material spills
- Raw sewage spills
- Isolation and quarantine to prevent the spread of dangerous illnesses
- Major natural disasters
- Potential bioterrorism exposures
- Radiological release events

The Clifton Health Department’s response plans include extra precautions and preparations to protect populations at greatest risk for the above-mentioned emergencies.

Recommended Items to Include in a Basic Emergency Supply Kit:

- Water, one gallon of water per person per day for at least three days, for drinking and sanitation
- Food, at least a three-day supply of non-perishable food
- Battery-powered or hand crank radio and a NOAA Weather Radio with tone alert and extra batteries for both
- Flashlight and extra batteries
- First aid kit
- Whistle to signal for help
- Dust mask, to help filter contaminated air and plastic sheeting and duct tape to shelter-in-place
- Moist towelettes, garbage bags and plastic ties for personal sanitation
- Wrench or pliers to turn off utilities
- Can opener for food (if kit contains canned food)
- Local maps

Additional Items to Consider Adding to an Emergency Supply Kit:

- Prescription medications and glasses
- Infant formula and diapers
- Pet food and extra water for your pet
- Important family documents such as copies of insurance policies, identification and bank account records in a waterproof, portable container
- Cash or traveler’s checks and change
- Emergency reference material such as a first aid book or information from www.ready.gov
- Sleeping bag or warm blanket for each person. Consider additional bedding if you live in a cold-weather climate.
- Complete change of clothing including a long sleeved shirt, long pants and sturdy shoes. Consider additional clothing if you live in a cold-weather climate.
- Household chlorine bleach and medicine dropper – When diluted nine parts water to one part bleach, bleach can be used as a disinfectant. Or, in an emergency, you can use it to treat water by using 16 drops of regular household liquid bleach per gallon of water. Do not use scented, color safe or bleach with added cleaners.
- Fire Extinguisher
- Matches in a waterproof container
- Feminine supplies and personal hygiene items
- Miss kits, paper cups, plates and plastic utensils, paper towels
- Paper and pencil
- Books, games, puzzles or other activities for children
Health Education occurs throughout all local health department programs, with a focus on providing education and health promotion services that help the public make informed decisions about their health. Health education programs and activities help the community achieve a healthier lifestyle and promote healthy behavior.

For more information, contact Layal Helwani at 973-470-5773 or lhelwani@cliftonnj.org.

The Health Department conducted outreach to the following:

- Local Schools
- Local Health Providers
- Local Businesses
- Local Faith-Based Organizations
- Local Childcare Providers
- Other Local Organizations

The Health Department posted, reviewed, shared and updated information to:

- City of Clifton Website
- TV Ads/Spots
- Social Media Pages *(Facebook, Instagram)*
- Local Print Newspapers/Newsletters
- Local Online Newspapers/Newsletters
- Municipal/County/Local Health Department E-Mail Distribution List
In 2017, Health Educator Layal Helwani provided education on Electronic Nicotine Delivery Systems (ENDS) to approximately 500 Clifton and Little Falls middle school and high school students.

Wildlife Presentation in the Township of Little Falls, August 2017

4th Annual Employee Health Fair, May 2017

National Night Out, August 2017

Health Department Staff getting trained in Cultural Competency and Healthy Homes
**NURSING & HEALTH SERVICES**

- Evaluations & referrals of home health problems.
- Communicable disease control: hepatitis, meningitis, salmonella, shigella, giardiasis, tuberculosis, & others.
- Non-public school nursing programs.

**Clinical Services (By Appointment Only)**

**BODY MASS INDEX SCREENING:**
This screening will help assess your risk for developing overweight or obesity and associated diseases.

**BONE DENSITY SCREENING:**
Co-sponsored by the Clifton Health Department and Hackensack UMC Mountainside Hospital.

**BLOOD DRIVE:**
Blood donation opportunity held at least twice a year.

**BLOOD LEAD SCREENING:**
Held to identify children who are at risk for elevated blood lead levels.

**BLOOD PRESSURE SCREENING:**
Held on a bi-weekly basis. Please call for appointment.

**CHOLESTEROL SCREENING:**
Blood test for total cholesterol, HDL, LDL & triglycerides.

**DENTAL CLINIC:**
Available to school age children who do not have dental insurance.

**FLU CLINIC:**
Influenza shots for adults & children.

**IMMUNIZATION CLINIC:**
Required immunizations for uninsured pre-school & school age children.

**MEN’S CANCER SCREENING:**
Prostate & colorectal cancer screening for eligible residents. Prostate cancer screening includes PSA blood test & digital rectal exam.

**ORAL CANCER SCREENING:**
Examination of teeth, gums, tongue, & cheeks for pre-cancerous lesions.

**PODIATRY SCREENING:**
Screening for abnormalities of the foot & ankle.

**SKIN CANCER SCREENING:**
Screening for skin abnormalities.

**VISION SCREENING:**
Examination for cataracts, glaucoma, & vision difficulties. No prescription given.

**HEARING SCREENING:**
Screening to determine if more extensive hearing tests are required.

**WELL BABY CLINIC:**
The Clifton Health Department provides communicable disease surveillance 365 days a year, 24 hours a day. Communicable disease surveillance epitomizes the public health motto, “Prevent, Promote, Protect”. Individual case-finding reduces risk through monitoring and education, maximizing the health of our public by minimizing the spread of communicable disease.

For more information, contact Leslie Leonard at 973-470-5777 or lleonard@cliftonnj.org.

Cases present themselves through the Communicable Disease Reporting and Surveillance System (CDRSS) on the nurse’s computer screen. Emergency cases may be called into the Health Officer, especially during the weekend hours. The cases are originally entered by the State Department of Health or Infectious Disease nurses if the patient is hospitalized.

The local/municipal public health nurse continues the surveillance process. If necessary, the patient or family is contacted for immediate information. A thorough investigation is completed with follow-up as necessary. Each case is different depending on the disease and communicability.

The Clifton Health Department provides nursing case management and full environmental intervention for children with elevated blood lead levels.

For more information, contact Melissa Spencer at 973-470-5764 or mspencer@cliftonnj.org.

Lead is especially dangerous to children under the age of 6. At this age, children’s brains and nervous systems are extra sensitive to the damaging effects of lead. Children’s growing bodies tend to absorb more lead. Whenever a child has a confirmed blood lead level of 15 [micro]g/dL or greater, or two consecutive test results between 10 [micro]g/dL and 14 [micro]g/dL that are at least between one month to three months apart, the local board of health shall provide for case management of the child and his or her family.

Whenever the State of New Jersey Department of Health receives a report from a laboratory of a blood lead level of 10 [micro]g/dL or greater in a child, the State of New Jersey Department of Health shall notify the local board of health in whose jurisdiction the child resides through the Childhood Lead Poisoning Information Database as set forth at N.J.A.C 8:51-10.

The State of New Jersey implemented changes to N.J.A.C. 8:51-10 regarding Childhood Lead Poisoning Level, effective September 2017. The blood lead level lowered from 15 [micro]g/dL to 5 [micro]g/dL. The same procedure follows.
As part of our mission to assure that all people have access to essential health services, local health departments provide a variety of individual, clinical services such as screenings and checkups, referrals to appropriate medical care, and primary medical care and follow-up.

For more information, contact Leslie Leonard at 973-470-5777 or lleonard@cliftonnj.org.

Vision of the Clifton Health Department

Healthy people making healthy choices in a healthy environment.
The Clifton Health Department is a contractual health agency serving the Township of Little Falls.
